

List: Race Field Standard Conditions 5.7 (d) (9) - Further reasons where an Approval Holder is not required to comply with clauses 5.7(a) or 5.7(c)

A licensed wagering operator is not required to comply with the Minimum Bet conditions where Racing NSW is satisfied that the reason for non-compliance properly falls within the list below:

- Systematic multiple identical bets from related/connected parties and/or from same IP address.
- Restriction to betting via a specified platform (eg. telephone) arising from reasonable held concerns by the wagering operator as to robotic or systematic use.
- Unauthorised scraping of wagering operator's website.
- Bets of employees/associates (and/or their associates) of licensed Australian wagering operators where there is a reasonably held belief that the bet is based on betting information (including but not limited to betting trends and bets placed with that licensed Australian wagering operator) that is not publicly available.
- Any bet that is contrary to the Australian Rules of Racing and the NSW Local Rules and Betting Rules.
